About Me

I am a passionate Front-End Developer and Machine Learning enthusiast with experience in building responsive web interfaces and AI-powered applications. During my internship at Web Blinders, I collaborated with senior developers to enhance UI functionality and optimize user experience. As a Machine Learning Intern at Edunet Foundation, I developed a medical diagnosis system using AI with 95% accuracy. My projects demonstrate strong skills in JavaScript, Python, and modern web technologies like HTML and CSS. I follow a modular development approach and emphasize clean, scalable code. Proficient in SQL and familiar with data structures and problem-solving techniques. I enjoy transforming ideas into real-world solutions that improve efficiency and usability. Currently pursuing a B.Tech in AIML, I'm driven to explore opportunities that combine AI and frontend development.

Experience

Education

B.TECH (CIVIL)

G.Pulla Reddy Engineering College

Kurnool, A.P

08/2022 – 05/2026

INTERMEDIATE

Narayana Junior College

Anantapur, A.P

06/2020 – 05/2022

SSC

L.R.G English Medium High School

Anantapur, A.P

06/2019 – 05/2020

Projects

AI-Powered Medical Diagnosis System

Implemented a system utilizing machine learning to analyze patient data.

[View Project](#)

AI AGENT

Implemented an AI agent for various automated tasks using Playwright and browser technologies.
